**Private counselling** - If you would like to explore accessing help privately you should ensure that the professional you see is experienced and qualified. This means that they will be a member of a recognised professional body. These bodies hold registers of approved practitioners who are governed by an ethical code and robust conduct and complaints procedures. An example of this is the British Association for Counselling and Psychotherapy (BACP). The BACP provides online search facility for accredited counsellors and psychotherapists in the UK.
